

Veterinary Technician Code of Ethics

Introduction

Every veterinary technician has the obligation to uphold the trust invested in the profession by adhering to the profession's Code of Ethics.

A code of ethics is an essential characteristic of a profession and serves three main functions:

1. A code communicates to the public and to the members of the profession the ideals of the profession.
2. A code is a general guide for professional ethical conduct.
3. A code of ethics provides standards of acceptable conduct that allow the profession to implement disciplinary procedures against those who fall below the standards.

No code can provide the answer to every ethical question faced by members of the profession. They shall continue to bear responsibility for reasoned and conscientious interpretation and application of the basic ethical principles embodied in the Code to individual cases.

Ethical standards are never less than those required by law; frequently they are more stringent.
